Testimonial for MTS – Mercury Technical Solutions Ltd

Over the past two years Shirebrook School has employed the services of the above company for the supply and installation of Interactive Whiteboard packages. In total the company have installed these packages in around 50 of our classrooms. They have also installed a comprehensive AV system into our school hall, where the package was designed around our needs and fitted to a very high standard.

MTS always provide us with competitive prices and there flexible service has allowed installations to be completed during term time without any disruption to the school. We have also asked the company to provide us with other products such as computers, printers and associated ICT products.

From that, it is without any hesitation I write this letter to recommend Mercury Technical Solutions as a reliable, flexible and professional partner.

Yours truly,

Simon Vernon
ICT Manager
